How to download anonymized study from Viewer?

## What can you upload?

You can upload DICOM files or files packed as zip. Files must contain DICOM files: studies, series and others.

## How upload works?

Firstly test if it DICOM file it will be skipped. Secondly try [anonymize](#) and then upload file to server. So goes for zip file: try extract and read file by it test for DICOM format skip, [anonymize](#) ; upload. All extracting ; anonymization is made your browser.

## Share?

You can share uploaded files via social network: facebook, twitter and so on by e-mail.

## Anonymization?

At this point - delete information about patient and attributes to identify person in each DICOM file. Anonymization is done your browser.  
*Do not upload files with information written in image!*
